THE STORY BEHIND THE NAME

LazyNest

Coming back home from a hard day's work is tiring. What is even more tiring is coming back and addressing other commitments. Now imagine an atmosphere set ready for you with the warmth that you expect to unwind and relax.

With the world shifting towards control at your fingertips - your food deliveries, groceries, shopping, etc. why not your house? Isn't home a place where you are supposed to be lazy?

Our Name embodies this spirit, to make your Nest, your sanctum, your sacred space, so smart, that you can laze in comfort.

'Laze' around and control your **'nest'** with **LazyNest.**

WHO WE ARE ?

A brand under Dalnex, we deliver innovative solutions to make your living, work, commercial and community spaces smarter. With years of experience in industrial automation, we started **LazyNest** to bring automation, comfort and convenience that comes with IoT and technology into everyone's life.

WE MAKE YOUR
HOME | OFFICE | HOTEL
SMARTER.

WHY US ?

We are not just another IoT/ home automation product vendor. We deliver an experience. A service to make your home-office-hotel-society smarter.

A one-stop solution for home and office owners, and a one-stop partner for architects, developers, hotel and building owners. Right from scoping the project to installing products, and providing after-sales support and service, we are all you need.

Complete vertical integration enables a higher standard of quality and service, right from the products we source to installing and servicing them at your homes, we do it all, and we do it best. Cutting edge solutions and products fuelled by constant innovation.

Control Appliances From Any Location

Control your home appliances from anywhere in the world. With simply a tap on the phone. See all the appliances in use in every room through your app. Turn them on or off at your convenience.

Set Schedules To Automate Mundane Tasks

Set schedules to operate appliances at preset times. Create routines to control appliances on daily automatic schedules. Set workflows that control appliances based on surrounding conditions. Set auto-turn off timers to turn off appliances after a preset time.

Scenes For Any Occasion

Create special scenes for special occasions using various home appliances. And turn them on with a tap on your phone. Be it an evening light scene after a hard day at work, or a birthday party scene for your child.

Universal Remote Control

No more hassles with 10 different remotes to control your appliances. Control all your IR remote controlled appliances like TV, Set-top box, AC etc. with a simple click on your smartphone.

IS YOUR
HOME SMART ?

Safety With No Compromises

Smart lock will guard your home when you're away. Also, lock rooms separately through the app for safety inside the home. Use motion and occupancy sensors to monitor motion in any room remotely. Your smart home app will alert you in the event of an intrusion

SECURITY

Intelligent Sensors For Smart Tracking

Give more power to your smart home with intelligent sensors that can make smart decisions for you. Watch out for any LPG leakage. Switch on your AC at high temperature. Monitor pollution in your home. Detect any intrusion. They'll alert you on time.

ENERGY
EFFICIENT

Detailed Power Stats

No more waiting till the end of the month to see your power bill. View your daily and monthly power consumption in real time. Track power consumed in individual rooms. See weekly trends in energy usage. Monitor power consumed by heavy duty appliances.

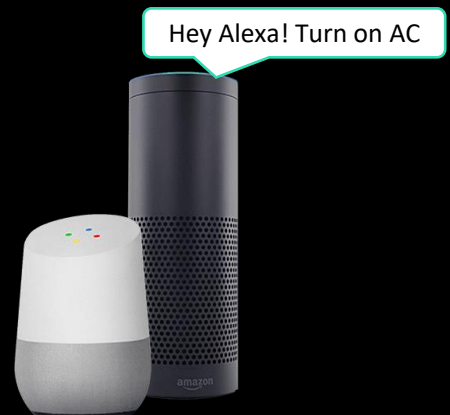

VOICE
CONTROL

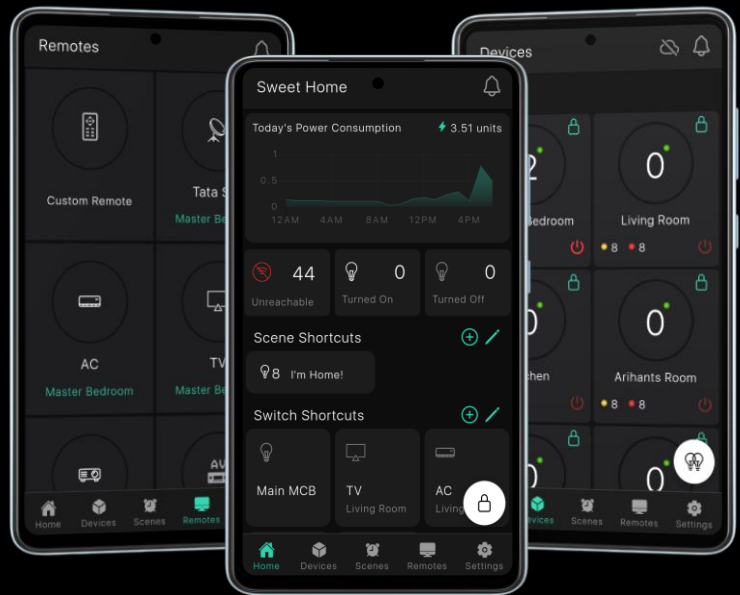

Voice Control With Google Assistant & Alexa

Just say, "Hey Alexa, Turn on the lights." or "Ok Google, Turn on the lights".

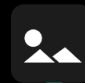

Compatible With

HOTEL AUTOMATION

DELIVER ★★★★★ HOTEL EXPERIENCE LIKE NEVER BEFORE!

Check In

As soon as the guest checks-in, they would receive a link via SMS and email. The link gives access to the smart guest room

Smart Guest Room

Guests can control all the appliances in the smart guest room using webapp from the link. They can change channels using voice or set mood by playing pre-defined scenes and much more.

No App Installation

Smart room access is granted to the guest with an elegant guest webapp that can be opened with an SMS or an email link, no need to download any app from the Play store or App store.

Voice Control

Control all the appliances in the room, change channels, setup scenes & much more with your voice. Supports Amazon Alexa & Google Home.

Smart Hotel Services

Provide Hotel services to your guests using the webapp. They can book slots, access promotions offered by the Hotel and also give feedback.

Checkout

Impressed by the smart hotel, guests would want to leave a five star feedback. The webapp access will be revoked as soon as they checkout.

SMARTER HOTEL SERVICES

Order food at your finger tips: View the restaurant(s) (in hotel) menu, checkout daily specials and Place Orders.

Convenient services: Schedule laundry, housekeeping and other services at customers' convenient timings.

Discounts & promotions: View promotions for different services with discounts, offers, coupons etc.

Timely Feedback: Customer feedback enabled every time a requested service is fulfilled.

Itinerary planning: Check out nearby tourist attractions, book cabs, plan trips etc. with the webapp.

Centralized Control

Switches/Appliances overview. Control from anywhere.

Manage Services

Set service timing. Manage guests requests, update food menus, telephone directories etc.

PMS Integration

Integrate the existing PMS software with the smart hotel portal to ensure maximum operational efficiency.

Energy Stats

Energy consumption stats & power excess usage alerts.

Run Promotions

Create promotions for any occasion. Notify guests through the hotel service webapp.

Manage Roles

Manage administrative roles. Delegate tasks and set access permission on each role inside the portal.

MADE EASY**

OFFICE AUTOMATION

IDEAL & SMART WORK ENVIRONMENT BE LIKE

Monitor Your Entire Infrastructure In One Place

In modern day Infrastructure it is very difficult to keep track of individual appliances installed at far away locations. We bring all your appliances on one central dashboard.

Control Whenever You Want, From Wherever You Are

Turn On or Off your appliances just by a tap from your desktop or your mobile phone. Restrict access to employees in the enterprise to your appliance control.

Schedule Your Appliances For Perfect Timing

Turn on/off appliances automatically to save energy. Can be used to manage Common area lighting, street lights, key tags etc in your enterprise.

Detect Deterioration In Machines Or Solar Panels In Advance

With granular data of power consumption and Intelligent parameters like harmonics, you can early detect flaws in machineries and save yourself from breakdowns.

Take Automated Actions With Workflows

Workflows do actions based on triggers, be it an anomaly or an event. Get a notification when an event occurs or take automated actions to protect your appliances.

BUILDING AUTOMATION

HASSLE FREE BUILDING MANAGEMENT

Enhanced Security And Surveillance System

Motion and occupancy sensors with smart surveillance cameras to detect intrusion at multiple points.

Smart Water Management

Centralized control of water pumps. Real-time water consumption report of every home using smart flow sensors.

Smart Common Area Lighting

Automated lighting system with single phase controllers. Centralized control of all common lights with features such as schedules, routines and workflows.

Smart Energy Meters

Provides real time power consumption tracking at different points in the building including every home. Get alerts to notify consumption over threshold limits.

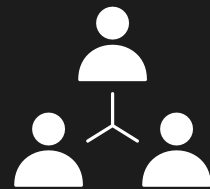

Centralized Building Management Dashboard

Generation of Detailed energy consumption reports. Provides easy building security monitoring. Includes smart water and lighting system management.

WHY SMART BUILDING ?

Attract a Diverse Set of Prospective Buyers

A survey by Schneider Electric has found that **78%** of customers with a budget of 50 lakhs+ desire to purchase a smart home. Smart homes' offer enhanced security with the added comfort of convenience and automation that'll attract more customers.

Stay Ahead of the Competition

The smart home market is growing at the rate of **30 %** year over year. Even middle income consumers are showing great interest in smart solutions. With features such as voice assistant, real-time power tracking, phone control over appliances, wow your customers away from your competition.

Get Great Value for Money

Smart home is just 0.5% of the total cost of a home. With appropriate workflows based on their usage patterns device users can save upto **10-20%** of their electricity bills.

Setup At Any Stage

Entire range of products can be integrated into a building at any stage of development without making changes to the existing infrastructure. We assist you, whether you want to give a new life to an unsold property or integrate with a new project.

ARE YOU
